SUMMARY

Career changer with hands-on **MERN stack** development experience and a strong passion for clean, scalable code. Known for supporting teams with a full-stack perspective and an **obsession with best practices** — from commit conventions and secure API design to thoughtful data modeling and beyond. **Curious by nature** and always seeking better ways to build, I thrive in **collaborative environments** and **enjoy solving real-world problems** while continually sharpening my skills.

EXPERIENCE SUMMARY

GENERATION THAILAND X KMUTT (2025)

Junior Software Developer

- Took part in **building CalNoy**, a clean food e-commerce website with calorie display and calculator features, using the **MERN stack** (MongoDB, Express, React, Node.js), **contributing from UI design in Figma to full-stack development**.
- **Provided consistent debugging support** throughout all sprints in an **Agile workflow**, helping the team resolve integration and logic issues early to stay on track and deliver on time.
- **Helped coordinate Git workflows**, including branch merging, and advocated for best practices such as using conventional commit messages, fostering smoother collaboration.
- Collaborated on the design and implementation of **RESTful APIs** and **MongoDB schema models**, with a focus on secure data handling, especially around sensitive user information.
- Contributed to **ER diagram planning**, API endpoint design, and **proposed a scalable folder structure** for the backend, supporting the team in understanding system architecture.
- **Helped create and maintain shared assets** like global theme variables, mock data, and reusable components to ensure consistency across the application.
- **Initiated team retrospectives** as part of Agile ceremonies and encouraged open discussion, helping establish a constructive feedback culture and improving collaboration throughout the project.
- **Supported peers in understanding context/state management** and shared insights across both frontend and backend tasks to promote cross-functional learning.

Kornkanok Printing (2022-2023)

Web Administrator (Wordpress)

- **Identified and resolved website usability issues**, enhancing performance across desktop and mobile platforms
- Applied CSS and JavaScript to redesign the company website, **improving responsiveness** and engagement
- **Optimized SEO**, increasing search rankings and sales

EDUCATIONAL HISTORY

Bachelor of Humanities (2016 - 2019)

KASETSART UNIVERSITY

High School (2010 - 2015)

SATRIWITTAYA 2 SCHOOL

SKILLS

Web Technologies : HTML, CSS

Programming Language:

JavaScript

Database : SQLite, MongoDB

Frontend Library : React

Backend Library : Node.js,

Express, Mongoose

Architecture & API Design:

RESTful API, MVC

CSS Framework : Tailwind CSS

CSS Preprocessor : SCSS

Version Control : Git, GitHub

CMS : Wordpress

Design Tools : Figma,

Photoshop, Illustrator

PROJECTS

CalNoy E-commerce Site

jsd9-catsudon-frontend.vercel.app

Built a clean food e-commerce site with calorie calculator to support beginner-friendly healthy eating.

Kornkanok Printing Website

www.kornkanokprinting.asia

Redesign and restructure the company website to enhance user-friendliness and improved SEO ranking to page 1

CERTIFICATIONS

Junior Software Developer (Cohort 9) Program

Successfully completed the Junior Software Developer (cohort 9) program, focusing on MERN Stack and behavioral development (BSM).

JavaScript Algorithms and Data Structures Certification

Earned certification for completing JavaScript Algorithms course on freeCodeCamp

Responsive Web Design

Earned certification for completing responsive web projects on freeCodeCamp
